

ABSTRACT OF THE DISCLOSURE

5 A method of installing a first self-contained data handling application to operate with a second, previously installed, self-contained data handling application having at least one call routine which is executed when the second data handling application is operated, is described. The method comprises

- 10 a) determining the presence of the second data handling application and, if it is present,
- b) generating a link to a software routine provided by, and utilizing when executed, the first data handling application, which will be executed by the call routine in the second data handling application.
